

FOR IMMEDIATE RELEASE

Kids are not born different, they are born human. This is exactly what Tikia Kidd has put together in her debut release titled *Life With J.A.K, Living with Albinism*.

About the Book

In *Life With JAK*, Tikia tells a story of Albinism through the eyes of her son, JAK.

JAK walks us through his life with Albinism and how his super technology tools allow him, and others like him, to exist day-to-day in the world as a superhero. We get a history lesson on Albinism and how the author humanizes a classified genetic disorder into a genetic enhancement. In essence, you will see those living with Albinism as normal as living without Albinism and the community forged into educating the world on People With Albinism (P.W.A).

We look forward to JAK's next adventure, as he takes on the role of SuperHero.

The Author . . . Tikia Kidd
